

Show/Edit Pattern Name

Objective

Check Pattern names to identify Pattern pieces when there are too many of them.

Location

Show Pattern Name

Main Menu Display 2D Pattern Show Pattern Name

Right Click Pop-Up Menu (on 2D window) Show Pattern Name

Edit Pattern Name

2D Toolbar Transform Pattern/ Edit Pattern Select Pattern Property Editor Name

Operation

1. Follow the indicated guideline below:

2D Toolbar Transform Pattern/ Edit Pattern Select Pattern Property Editor Name

2. Select and enter as desired for the Name field.
Click on empty spot of the Property Editor to save the change.
3. To name multiple patterns the same, hold down the Shift key on the keyboard to select desired Patterns.(MD 8)
4. Select and enter as desired for the Name field.
The same name is applied to all selected Patterns and the names are numbered automatically (e.g: Pattern_1, Pattern_2 Pattern_3...).

Note: When a single Pattern is cut, using the Cut feature, the Pattern name is remained but numbered behind the name (e.g.: Pattern_1, Pattern_2 Pattern_3...).(MD 8)
