

Open/Save Block Components

Objective

Open or save Block Component (ZBLC) files.

Location

- Modular Mode > Block Editor Block List (Open icon)
- Modular Mode > Block Editor Block List (Save icon)

Operation

Open

1. Click on the Open icon in the top right of each Block Component within the Block Editor list.
The icon will appear when clicking on the name or mousing over the image of the Component in the list.
2. After the Open File menu appears, locate the desired Block Component.

Save

1. Select a Block Component from the list that appears in the Block Editor.
2. Click on the Save icon in the top right of the selected Block Component.
The icon will appear when clicking on the name or mousing over the image of the Component in the list.
3. Additional settings that can be applied will appear in the following menus:

Thumbnail	Use Block Component Thumbnail	A default thumbnail image will be generated for the thumbnail.
	Create New Thumbnail	Select an image to use as the thumbnail.

4. The file will be saved and will appear in the Configurator if the folder is linked.
