

# Activate/Deactive Sewing Lines

## Objective

Sewings can be activated or deactivated by sewing segments.

Use this function to easily open or close the adjusted parts of a garment, such as when sewing garments with vents like jackets, etc.

## Location

### Activate/Deactivate Selected Sewing

- Main Menu Edit Context Menu Sewing Deactivate/Activate Sewing (Selected)
- Object Browser Pop-Up Menu (Right Click Sewing List) Deactivate/Activate Sewing
- 2D Toolbar Edit Sewing Tool Pop-Up Menu (Right Click 2D Pattern Window Sewing) Deactivate/Activate Sewing
- 2D Toolbar Edit Sewing Tool Property Editor (Click Sewing) Activate On/Off  (Checkbox)

### Activate Sewing (All)

- Main Menu Sewing Deactivate/Activate Sewing (All)
- 2D Toolbar Edit Sewing Tool Pop-Up Menu (Right Click Sewing) Activate Sewing (All)
- Object Browser Pop-Up Menu (Right Click Sewing List) Activate Sewing (All)

## Operation

1. Find and click the menu indicated in **Location** over the corresponding object

Deactivated sewings will turn white in the 2D Pattern Window and the 3D Garment Window, and their names will turn dark gray in the Object Browser and Sewing List.
