

# Fold Arrangement

## Objective

Fold seam allowance, collars, and cuffs in the 3D Window before Simulation is activated.

## Location

- Main Menu > 3D Garment > Fold Arrangement
- 3D Garment Window Toolbar >  (Fold Arrangement) Tool

## Operation

1. After the patterns have been arranged, find and click the menu indicated in **Location**. All of the garment's Internal Lines/Shapes will be highlighted.
2. Click on the Internal Line/Shape you would like to fold. The Folding Gizmo will appear.
3. Use the red and green arrows, along the blue circle, to rotate the patterns. The patterns will fold and arrange accordingly.

The Fold Arrangement tool can also be utilized for specific folding needs after a garment has been draped / simulated.
